ESPALIER DWARF TRAINED FRUIT TREES BY LEUTHARDT

ALONE PROVIDE THE ATMOSPHERE THAT MAKES YOUR GARDENING THRILLING!

Decorative

Espaliers are especially useful for training on leaders at the corners of a building. They are very effective when placed in series between windows. Available in apple, pear, plum, peach, nectarine, apricot, these decorative trees bear generous crops of firm, large size and colorful fruit.

A Single U-form Espolier Can Be Trained To Any Height.

Practical

The three fold U-form offers a practicol investment. It beors highly colored, large size fruit, unexcelled in flavor. Avoilable only in apple and pear variety, up to 8 feet high—6 feet wide.

Beauty

The eight-arm U-form is probably the most attractive ond practical of all Espalier trees. From the time the first pink of the flower buds shaw in the Spring, these trees are a canstant source of beauty.

Novelty

These six-arm Palmette Verrier trees lend themselves to wide areas af wall space, or trellises, and pergolas. Avoilable in apple, plum and pear in four, six ond eight armed vorieties.

Distinctive

The four-arm Palmette Verrier, is a masperiece of the art of Espalier training. It adds a distinctive note to a doorway, gate or arbor. The Palmette Verrier is a practical form, easy to keep true to shape. Ideal for beginners growing Espalier trees.

HENRY LEUTHARDT AMERICA'S PIONEER GROWER OF THESE ESPALIER TREES

FOR centuries, the Old World castles and estates have relied on Espalier trees for decoration, beauty and practicability. Aside from their beauty and charm, they proved a good investment in yielding excellent large fruit —often utilizing space otherwise wasted.

It remained for Henry Leuthardt, America's pioneer Espalier specialist, to develop these trees suitable for this country's soil and conditions. For over 15 years, these fascinating trees have been the luxury of the wealthy, in the U. S.— providing many of the leading estates with a degree of splendor and beauty never before known. Through enlarged facilities these distinctive trees are now available to every garden at popular prices.

Mr. Leuthardt personally trains and tends, with his own hands, every one of the Espalier trees in his extensive nurseries at Nyack, Bedford and Portchester, N. Y. He has trees of every style to suit every garden and pocketbook.

NOT ONLY ORNAMENTAL AND PRACTICAL BUT DIVIDEND PAYING IN PRODUCTION OF LUSCIOUS FRUIT OF EXCELLENT FLAVOR

Of the many interesting patterns made with Espalier Trees, none is more attractive than the Belgain Fence. This consists of two-armed trees specially trained to fit into the pattern. The effect is a diagonal lattice work of living green, always exquisitely beautiful.

The horizontal double cordon is ideal for making division line between vegetable and fruit garden. In this unusual, yet practical shape, these trees produce the same large size fruit as all other types and varieties of Espalier trees.

FRUIT THIS YEAR

Trees planted in early Spring usually bear fruit the same year. They develop their full fruit yielding capacities in their second year. Espalier trees are easy to care for. A careful, yet severe, pruning twice a year keeps trees in their original shapes. They can be planted on any exposure except North. They cast no additional shade and allow the sunshine to pour into the garden. They are easy to spray and the fruit can be readily harvested. Packed for shipment in individual crates, the roots of the Espalier trees are surrounded by a ball of rich soil and fertilizer and nourishment sufficient for three years.
